Helping the future of our environment

Every year, 400 million tonnes of plastic is produced and 40% of that is single use which means it's not recycled and only used once before being thrown away. Because plastic is not biodegradable and rot like food or paper it takes hundreds of years before it's gone. It can also potentially leak pollution into the soil and water.

What can we do? Thurrock Catering Services have made some changes to the produce we purchase to reduce the use of single use plastic by buying our yoghurt in bulk to eliminate the use of individual pots and replaced disposable cutlery where it's used, with wooden. We have also stopped using individually wrapped cheese portions and other plastic containers.
